

IndusJS Fleet

Complete Screen & Feature Catalog

Every screen, dialog, and popup in the Fleet mobile app — documented from app launch, A to Z, with a screenshot, a description of what each screen does, and the features it offers. Kotlin Multiplatform (Android · iOS · Web).

- 14. 14 · Vehicle Finance — 4 screen(s)

1 · App Launch & Global Navigation

Screenshot
not captured yet

App Launch (Auth Check & Routing)

System

Initial app entry point that checks auth status and onboarding completion to determine the starting screen (Login, Onboarding, Dashboard, or Subscription gate). Handles session expiry by listening to auth events and re-routing to Login with a snackbar message.

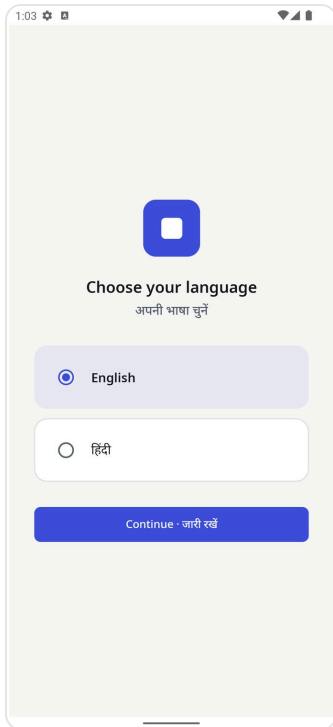

FEATURES

- Splash loading screen with `CircularProgressIndicator` shown while auth status is being checked
- System-back button / gesture handling via Navigation 3 `NavBackStack`
- Auto-redirect on session expiry or unauthorized access with user-facing snackbar message
- Automatic logout handling with navigation back to Login
- App initialization (cost types caching, permissions refresh) on successful auth
- File picker integration for document uploads
- Document preview, download, and save callbacks for multi-platform support
- Razorpay payment launcher integration passed via `CompositionLocal`
- Safe area padding (`statusBar`, `navigationBar`) applied at root
- Offline caching support via Settings-based storage

DIALOGS & POPUPS

Snackbar (Session Expiry)	Snackbar	Displays session expiry or unauthorized error message (e.g., 'Your session has expired. Please log in again.') after auto-redirect to Login
----------------------------------	----------	---

States / gating: Loading state shown with `CircularProgressIndicator`. Once auth check completes, routes to one of: Onboarding (if not completed), Language Picker (if first launch), Login (if not authenticated), Subscription gate screens (plan selection, payment, org/team setup) (if authenticated but gates not passed), or Dashboard (if fully authenticated and gated). Error state: auth check failure defaults to Login route.

language-picker-first-launch-light.png

Language Picker (First Launch)

Onboarding

Bilingual first-launch language picker shown once before any sign-in screen. Auto-detects system locale (Hindi vs English) and allows user to persist their choice (EN or हिंदी) before proceeding to Login or other startup destinations.

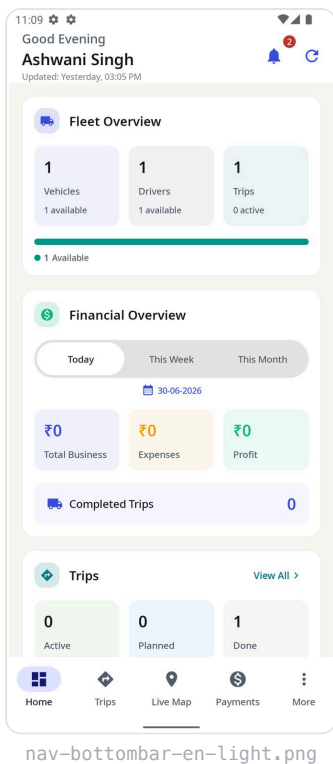

FEATURES

- Full-screen centered overlay with Fleet logo in rounded-square primary-colored box
- Bilingual heading: 'Choose your language' (EN) + 'अपनी भाषा चुनें' (HI) shown together pre-choice
- Two large selectable cards (English, हिंदी) with radio buttons and hover/selection styling
- Selected card highlighted with primaryContainer background and primary border
- Unselected card has surface background with outlineVariant border
- Bilingual continue button label: 'Continue · जारी रखें'
- System locale auto-detection (Locale.current.language starts with 'hi')
- If re-opened from Sign-In profile screen, preselects the currently active language instead of system default
- Persists choice via AppLanguageController immediately and re-localizes the entire app live
- Safe dismissal: does not show back button (first-launch is modal and gating)

DIALOGS & POPUPS

None

States / gating: Shown when `needsLanguagePick = true` (set on app launch if `!languageManager.hasChosen()`). Preselection: system locale on first launch, or the currently-active language if re-opened from profile. No error/empty states.

nav-bottombar-en-light.png

Navigation Scaffold (App Chrome)

System

Global navigation chrome that wraps all logged-in screens with a permission-gated bottom navigation bar (Compact breakpoint) or navigation rail (Medium+), plus a 'More' sheet for overflow destinations. Routes to the active top-level destination (Dashboard, Trips, Maps, Payments, Vehicles, Drivers, Customers, Team, Finance, Reports, Profile).

FEATURES

- Bottom navigation bar (Compact: <600dp width): Home + 3 permission-gated destinations backfilled from an ordered priority + 'More' button
- Navigation rail (Medium: 600–840dp): compact icon-above-label vertical nav matching the bottom bar layout
- Expanded navigation rail (Expanded: >840dp): full 248dp wide pill-style rail with icon + label side-by-side for all destinations
- Selected destination highlighted with primaryContainer background pill and onPrimaryContainer icon
- Unselected destinations use onSurfaceVariant icon/label on transparent background
- Content-driven bar height (no fixed 80dp): ~64dp for single-line EN labels, grows for Hindi wrapping
- Badge count support on nav items (e.g., alerts, unread)
- Permissions checking: each destination (Trips, Maps, Payments, Vehicles, Drivers, Customers, Team, Finance, Reports) only shown if user has corresponding VIEW or MANAGE permission
- Backfill priority ordering: if a middle destination is not permitted, the next permitted item moves up to fill the slot
- Profile always appears in 'More' sheet, never in the bar
- Tab switching logic: switching to a top-level nav destination pops back to Dashboard root first, then pushes the new destination, ensuring clean stack
- Navigation rail scrolls vertically if destination list exceeds viewport on Expanded
- Snackbar host at the scaffold root (displays session-expiry, auth errors, etc.)

DIALOGS & POPUPS

More Sheet	Bottom Sheet	Modal bottom sheet containing all overflow destinations (not in the bar) + Profile + theme toggle. Shown when 'More' button tapped in Compact/Medium breakpoints. Closes on destination selection or manual dismiss.
-------------------	--------------	--

States / gating: Shown only when on a top-level destination (Dashboard, Trips, Maps, Payments, Vehicles, Drivers, Customers, TeamList, VehicleFinance, Reports, Profile). Hidden for detail screens, create/edit flows, auth screens, or onboarding. Breakpoint-responsive: Compact → bottom bar, Medium → compact rail, Expanded → full rail with inline labels.

Screenshot
not captured yet

More Sheet (Overflow Navigation)

Navigation

Modal bottom sheet overlay accessed from the 'More' button on the nav bar/rail. Lists all permission-gated destinations not promoted to the bar/rail, plus Profile, with a theme toggle at the bottom.

FEATURES

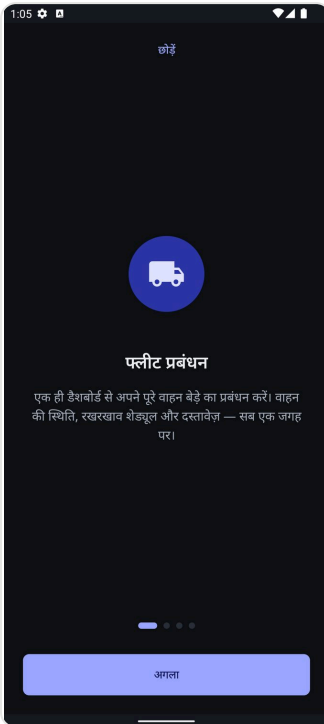

- 'More' (or localized equivalent) title at the sheet top in titleMedium font weight
- List of navigation rows: each row contains an icon + label + ripple effect on tap
- Overflow destination rows: all items from `backfillOrder.drop(PRIMARY_SLOTS)`, already permission-gated upstream
- Profile row always present (icon_settings, label 'Profile' / 'प्रोफाइल')
- Horizontal divider between destination list and theme toggle
- Theme toggle row at the bottom: icon (sun for light mode, moon for dark mode) + label ('Light Mode' / 'Dark Mode' or localized), clickable to toggle global theme
- Row styling: full-width clickable area with horizontal padding L, vertical padding M; icon size Default, onSurfaceVariant tint; label onSurface color
- Navigation bar padding (navigationBarsPadding) and bottom spacing (S) to avoid system nav cutoff
- Tint logic: sun icon shown if currently in dark mode (to hint 'switch to light'), moon shown if light
- Dismisses on destination selection OR manual swipe-down / tap outside
- No scroll: fits within typical sheet height (unlikely to overflow)

DIALOGS & POPUPS

None

States / gating: Shown as a `ModalBottomSheet` overlay when `showMore = true` (triggered by 'More' button tap). Dismisses on tap of a destination row, theme toggle, or manual dismiss (swipe-down, outside tap). Permission-gated: only reachable destinations are rendered.

2 · Onboarding & Subscription

onboarding-intro-HI-dark.png

Onboarding

Onboarding

Onboarding

Multi-page introduction carousel shown on first app launch, highlighting key fleet management features (vehicle tracking, driver management, trip planning, cost analysis). User can skip or complete all pages to proceed to login.

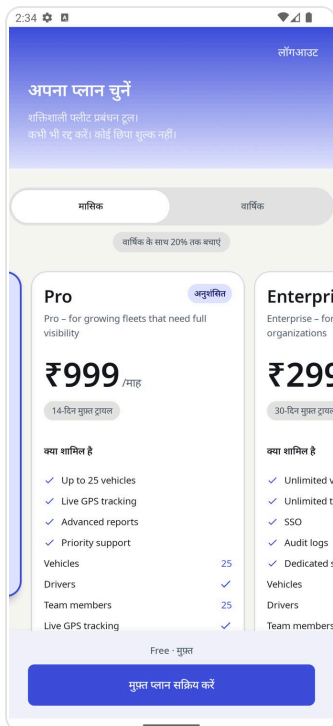

FEATURES

- 4-page horizontal carousel with swipe/pagination navigation
- Page titles and descriptions (one feature per page with icon illustration)
- Animated page indicator dots showing current position
- Skip button (hidden on last page) to bypass intro
- Next button on intermediate pages to advance manually
- Get Started button on final page to complete onboarding
- Full-width centered layout on mobile; constrained width on tablet/web (480dp max)
- Background color from Material Design color scheme
- Illustrated icon (vehicle, driver, trip, cost) in circular container on each page

DIALOGS & POPUPS

None

States / gating: No loading/error states; static carousel. Completion status persisted to Settings so carousel does not re-appear. No permission gating.

onboarding-plans-HI-neutral-recommended.png

Subscription Plans

SubscriptionPlans Subscription

Plan selection interface allowing user to browse available subscription tiers (Free, paid plans) with pricing and feature details. Supports monthly/annual billing toggle. Triggered after successful login if user needs to select a plan or complete payment.

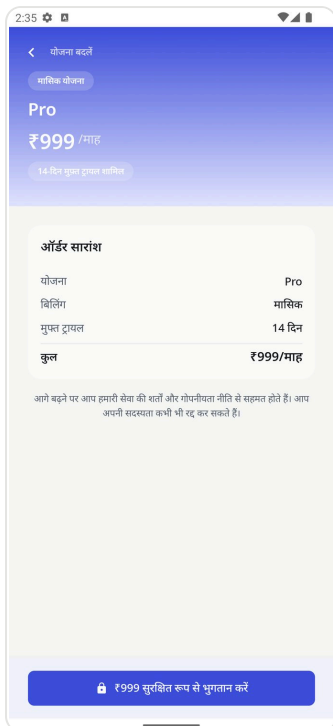

FEATURES

- Hero header banner with gradient background and logout action
- Two page modes: CHOOSE (first-time user) and COMPLETE_PAYMENT (unpaid user re-entering)
- Billing interval toggle (Monthly/Annual) with annual savings callout chip
- Mobile: horizontal carousel of plan cards with peek + animated page dots
- Tablet/Desktop: 2-column grid layout for plan cards
- Plan cards showing name, price, trial days, and feature list (checkmarks/X marks per feature)
- Selected plan highlighted with primary color border, elevation, and check badge; alternate plans neutral
- Trust strip with SSL, UPI/card payments, and cancel-anytime assurances
- Sticky bottom CTA bar showing selected plan name + price and Primary button (Select/Continue/Activate Free)
- Snackbar error display for load/selection failures
- Loading spinner with 'Loading plans...' message
- Retry button on error-only state

DIALOGS & POPUPS

None

States / gating: Loading (full-screen spinner), Error (full-screen error card with retry), Empty plans (error state), Confirming (CTA button disabled/loading). Free plan selection skips payment and proceeds to organization creation.

onboarding-checkout-HI-neutra
l.png

Payment Checkout

SubscriptionCheckout

Subscription

Order summary and secure payment initiation for selected subscription plan. Displays plan details, billing amount, trial period, and annual savings. Integrates with Razorpay payment gateway to collect payment.

FEATURES

- Hero banner showing plan name, billing interval (Monthly/Annual), price, trial badge (if applicable), and annual savings badge (annual only)
- Back button + 'Change plan' label to return to plans screen
- Order Summary card listing plan name, billing interval, free trial days (if >0), and total amount
- Savings callout on total row when annual billing is selected
- Legal terms text regarding payment and subscription terms
- Snackbar for error messages (payment creation, verification failures)
- Error banner (inline) for display of payment errors
- Sticky pay button at bottom showing 'Pay securely ₹{amount}' with lock icon
- Full-screen overlay modal (scrim + centered card) showing spinner and status during order creation and payment verification
- Modal displays different title/subtitle: 'Preparing Order' (creating) vs 'Verifying Payment' (verifying)

DIALOGS & POPUPS

Razorpay Checkout	Popup Menu	Platform-specific payment UI (Razorpay gateway) launched when user taps pay button; handles card/UPI/wallet entry and tokenization
Payment Status Overlay	Dialog	Full-screen modal with spinner shown during order creation and payment verification to prevent interaction and display progress

States / gating: Loading on initialize (implicit). Busy overlay shown during order creation (*isCreatingOrder=true*) and payment verification (*isVerifyingPayment=true*). Error state shown inline + snackbar. Pay button disabled while busy, enabled when plan initialized.

Payment Success

SubscriptionSuccess

Subscription

Confirmation screen after successful payment, displaying receipt details (plan name, amount, currency, status) and guiding user to organization creation step.

FEATURES

- Step indicator showing Progress: Payment (current/completed) → Organization → Dashboard
- Animated success check-mark icon (scaled entry animation, EaseOutBack easing)
- Success title and subtitle text (animated fade-in + slide-up)
- Receipt card (animated delayed fade-in + slide-up) showing plan name, amount (formatted with currency symbol), status (Confirmed, highlighted chip), with divider separating rows
- Welcome/next-step card (tinted primaryContainer) with trophy icon, title, and supporting text about organization setup
- Primary CTA button 'Set Up Organization' with right-arrow icon at bottom
- Mobile: full-width layout; Tablet/Desktop: centered content constrained to 480dp max width

DIALOGS & POPUPS

None

States / gating: No loading/error states. Content animates in sequentially (icon → text → receipt → welcome card → button) with staggered delays. No permission gating.

Screenshot
not captured yet

Create Organization

CreateOrganization

Subscription

Organization creation form requiring organization name entry. Tenant/organization is the top-level billing and team container. Completion routes to team member creation.

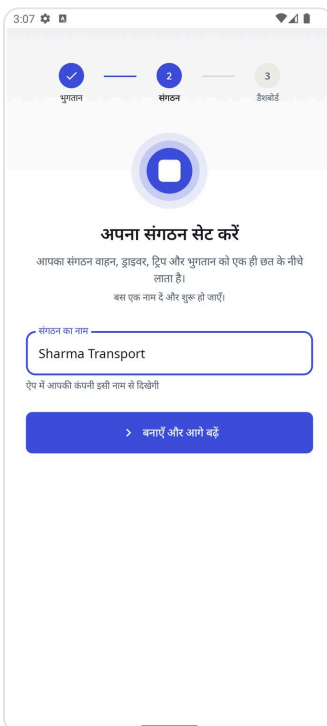

FEATURES

- Step indicator showing Progress: Payment → Organization (current) → Dashboard
- Animated Fleet logo icon in concentric circles (scaled entry animation, EaseOutBack easing)
- Title 'Create Organization', description text, and CTA hint (all animated fade-in + slide-up)
- Organization Name input field (FieldType.DEFAULT) with label, placeholder, optional inline error, and supporting hint text below field
- Error banner (inline FleetInlineErrorBanner) displayed below field only when field has validation error
- Primary CTA button 'Create Organization' with right-arrow leading icon; enabled only when name is non-blank and field error is null
- Button shows loading spinner and is disabled during submission (isCreating=true)
- Mobile: full-width layout; Tablet/Desktop: centered form constrained to 480dp max width
- Keyboard dismissal on 'Done' action, optionally submitting form

DIALOGS & POPUPS

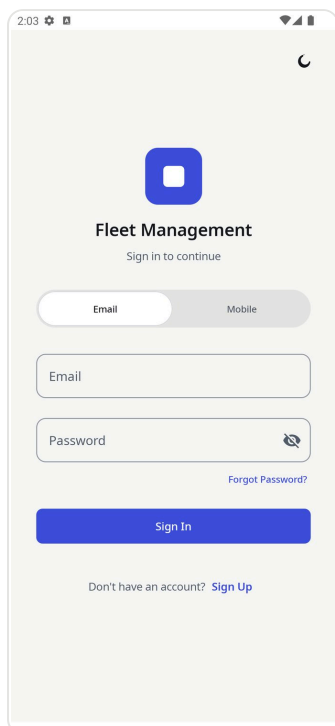

None

States / gating: Loading on init (implicit). Submitting (button loading/disabled, isCreating=true). Field-level error shown inline. Top-level error shown in banner. No permission gating.

org-setup-HI-enabled-cta.png

3 · Authentication & Profile

signin-rebuild-EN-light.png

Login

Login Auth

User authentication entry point with email or mobile-based login. Includes splash screen for auth status checking.

FEATURES

- Email / Mobile login mode toggle (segmented pill)
- Email input field with validation
- Mobile number input field (10 digits, auto-filtered)
- Password input field with visibility toggle
- Forgot Password link
- Sign Up navigation link
- Theme toggle button (top-right)
- Language picker button (top-left, bilingual 'भाषा / Language' label)
- Loading spinner during auth check
- Error message display
- Responsive layout (full-width on phone, centered max 480dp on tablet/web)

DIALOGS & POPUPS

Language Picker	Dialog	Select app language (English or Hindi) at login
Error SnackBar	SnackBar	Display login errors (invalid credentials, network failures)

States / gating: Loading (splash with logo + progress), Error (dismissed via snackbar), Ready (form displayed). No empty state.

Sign Up

SignUp Auth

New user registration with name, email, mobile, and password. Validates fields and navigates to OTP verification on success.

FEATURES

- Back button (top-left, navigates to Login)
- Heading + subtitle text
- First Name input (half-width, paired)
- Last Name input (half-width, paired)
- Email input with validation
- Mobile number input (10 digits, auto-filtered) with validation
- Password input field
- Confirm Password input with mismatch error check
- Inline error messages per field
- Error banner (full-width, dismissable)
- Create Account button (enabled when form valid, loading state)
- Divider with 'or' text
- Already have account? Sign In link
- Responsive layout (full-width on phone, centered ~480dp on tablet/web)

DIALOGS & POPUPS

Snackbar	Snackbar	Display signup errors or success notifications
----------	----------	--

States / gating: Loading (button shows spinner), Error (inline per field + banner), Ready (form enabled). No empty state.

Screenshot
not captured yet

Sign Up Success

SignUpSuccess Auth

Confirmation screen after signup or email resend, shows next steps and redirects to login.

FEATURES

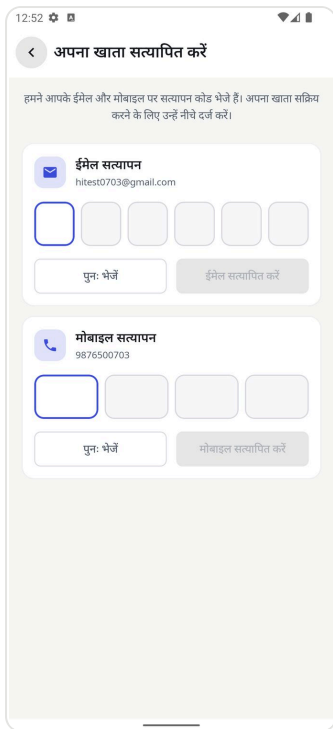

- Success/email icon chip (tertiary color for signup, primary for resend)
- Dynamic title (signup vs. resend variant)
- Prominent message card (primary container, centered text)
- Descriptive subtitle text
- Titled section card with 3 next-steps bullet points
- Go to Login button (large, primary)
- Centered, scrollable layout with max-width constraint on tablet/web

DIALOGS & POPUPS

None

States / gating: Ready only (no loading, error, or empty state). Displays based on `isResend` flag.

Screenshot
not captured yet

onboarding-otp-HI-light.png

OTP Verification

OtpVerification Auth

Verify email and/or mobile OTP during signup or login. Shows separate sections for each channel that needs verification.

FEATURES

- Back button (top-left, navigates to Login)
- Subtitle text (dynamic based on whether email, mobile, or both need verification)
- Email OTP Section (if email verification needed): icon chip + title + email display + verified pill (when done)
- Email OTP section: 6-digit OTP input, Resend Email button, Verify Email button, inline error
- Mobile OTP Section (if mobile verification needed): icon chip + title + mobile display + verified pill (when done)
- Mobile OTP section: 4-digit OTP input, Resend Mobile button, Verify Mobile button, inline error
- Global error message display
- Loading states per channel (isEmailVerifying, isMobileVerifying)
- Resend cooldown states (isResendingEmail, isResendingMobile)
- Responsive layout (full-width on phone, centered max 480dp on tablet/web)

DIALOGS & POPUPS

Snackbar	Snackbar	OTP verification errors or resend confirmations
----------	----------	---

States / gating: Loading (per-channel spinners on buttons), Error (inline per channel + global), Verified (pill shown, fields disabled). Handles partial verification (one channel done, other pending).

Forgot Password

ForgotPassword Auth

Two-step password recovery: email/mobile identifier submission, then reset token + new password entry.

FEATURES

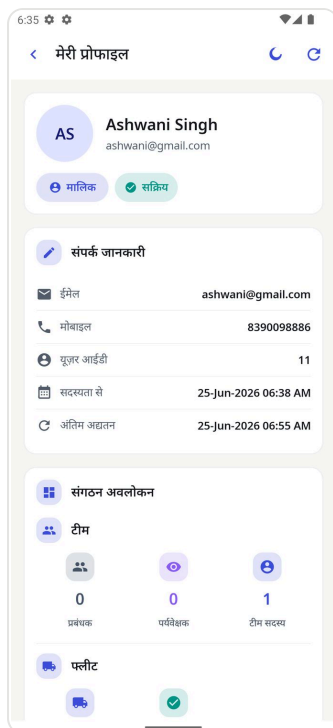

- Back button (top-left navigates to Login)
- Title (dynamic: 'Forgot Password' or 'Reset Password')
- Step 1 - Identifier submission: lock icon chip, heading, description
- Email-or-mobile identifier input (label: 'Email or Mobile'), inline validation
- Send Instructions button (primary, large)
- Back to Login button (ghost, secondary)
- Step 2 - Reset Password (after success): lock icon chip, heading, description
- Reset token input field (from email link), inline error + hint
- New Password input (policy enforced by backend only)
- Confirm Password input with mismatch error check
- Reset Password button (primary, large, enabled when token + passwords match)
- Error display (full-width, centered)
- Responsive layout (full-width on phone, centered max 480dp on tablet/web)
- Scrollable form on smaller screens

DIALOGS & POPUPS

Snackbar	Snackbar	Password reset errors or success notifications
----------	----------	--

States / gating: Loading (button spinners), Error (inline field errors + full error message), Success (transitions to Step 2). Handles both identifier validation and password mismatch UI checks.

Screenshot
not captured yet

profile-hi-light.png

Profile

Profile User

Display user identity, contact info, organization stats (if owner), language preference, and account actions (edit, change password, logout).

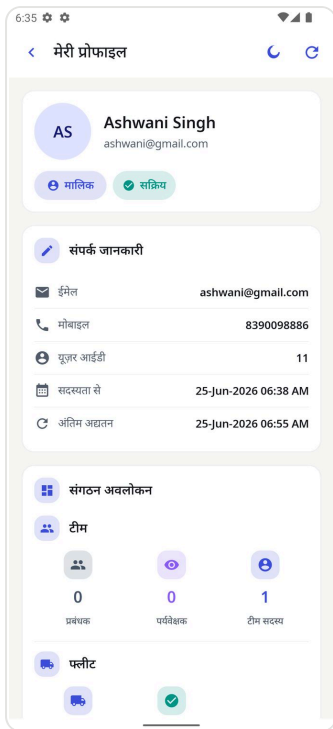

FEATURES

- Back button or navigation (implied in top app bar)
- Title: 'Profile'
- Theme toggle icon (top-right)
- Refresh button (top-right, when not editing) / Cancel button (when editing)
- Profile Header card: avatar (initials-based), full name, email, role badge (Owner/Admin/User), account status badge (Active/Inactive)
- Profile Details card: email, mobile (formatted), user ID, member since (date), last updated (date)
- Organization Stats card (Owner only): Team section (admins, team members, total), Fleet section (total vehicles, active vehicles), Trips section (total, active, completed) with stat tiles + icons
- Owner Info card (non-owners): owner name, owner email
- Language card: current language display + edit icon, clickable to open language dialog
- Account Actions card: Edit Profile button (primary), Change Password button (secondary), Logout button (destructive)
- Loading spinner (when loading profile)
- Error state with retry button
- Scrollable lazy column layout on all breakpoints

DIALOGS & POPUPS

Language Dialog	Dialog	Select from available app languages (English, Hindi) with radio list; 'Yes, switch' button enabled only if different from current
Logout Confirmation	Confirmation	Confirm before logging out
Error SnackBar	SnackBar	Show profile update or load errors

States / gating: Loading (spinner center-aligned), Error (retry button), Ready with data (view mode or edit mode). Edit mode replaces content with Edit Profile form.

profile-hi-light.png

Edit Profile

User

Sub-screen within Profile allowing inline editing of first name, last name, email, and mobile number with per-field validation.

FEATURES

- Hero card header (primary container): edit icon + heading + subtitle
- Titled section card: Personal Details
- First Name input with leading icon (person icon), error display
- Last Name input with leading icon (person icon), error display
- Email input with leading icon (envelope icon), error display, `FieldType.EMAIL`
- Mobile input with leading icon (phone icon), error display, `FieldType.PHONE`, 10-digit filter
- Inline error banner (full-width, if save fails)
- Save button (primary, large, enabled when all fields valid, loading state)
- Scrollable lazy column with centered max-width constraint on tablet/web
- Cancel action in top app bar

DIALOGS & POPUPS

Snackbar

Snackbar

Notify of profile save success or errors

States / gating: Loading (button spinner, fields disabled), Error (inline banner + error messages per field), Ready. Form is modal within Profile screen.

Screenshot
not captured yet

Change Password

ChangePassword

User

Authenticated user changes their password. Validates current password match, new != current, and confirm matches new.

FEATURES

- Back button (top-left, navigates back)
- Title: 'Change Password'
- Lock icon chip (primary accent)
- Heading + description text
- Section card containing form fields
- Current Password input field (masked, no min-length hint)
- New Password input field (masked, policy enforced by backend)
- Confirm Password input field (masked, UI mismatch check with error display)
- New Same as Current error message (inline on new password field)
- Confirm Mismatch error message (inline on confirm field)
- Server error message display (full-width, centered)
- Change Password button (large, enabled when all fields filled, match, and new != current, loading state)
- Responsive layout (full-width on phone, centered max 480dp on tablet/web)
- Scrollable form

DIALOGS & POPUPS

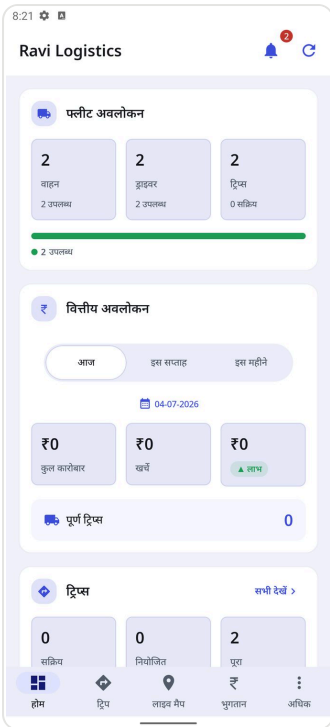

Snackbar

Snackbar

Display success or error notifications for password change

States / gating: Loading (button spinner, fields disabled), Error (inline field errors + server message), Ready. Backend policy (min length, complexity) not checked client-side.

4 · Dashboard (Home)

tint-home-softindigo-HI.png

Dashboard Home

Dashboard Home

Primary home screen displaying real-time fleet overview, financial summary, active trips, alerts, vehicle and driver status, and quick-action navigation.

FEATURES

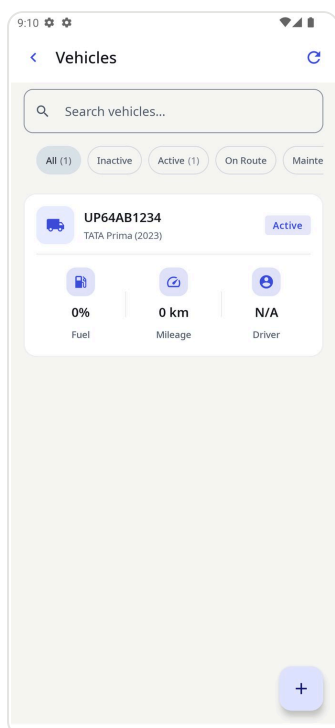

- Top bar with business/tenant name, notification badge (>99 capped), and data-freshness state indicator (muted dot when data >15 min old)
- Refresh button with rotating animation during refresh
- Linear progress bar during data refresh
- Offline banner with retry/dismiss buttons when cached data is shown (error message + last updated timestamp)
- Fleet Overview hero card: total vehicles, drivers, trips with availability counts, and horizontal color status bar (On Route/Planned/Available/Maintenance/Inactive) with legend
- Financial Overview section (permission-gated, hidden if no financials:read permission): segmented tabs for Today/This Week/This Month, date range indicator, revenue/expenses/profit tiles with profit/loss delta chip (▲ or ▼)
- Completed trips count in Financial Overview with icon and badge
- Financial empty state (Getting Started) with 'Add Vehicle' and 'Create Trip' buttons when no fleet exists
- Trips Status section: metric tiles for active/planned/completed counts, preview of up to 2 ongoing trips (route, vehicle, driver, On Route badge)
- Alerts section: summary badges for critical/warning/info counts, detailed expiry breakdown (docs expired, docs 7d, licenses expired, licenses 7d), up to 3 alert items with type-specific icons and colors, success 'All Clear' empty state
- Vehicle Status section: metric tiles for on-route/planned/available vehicles with action buttons (Add Vehicle, Add Cost)
- Drivers Status section: metric tiles for on-route/planned/available drivers with action buttons (Add Driver, Add Cost)
- Loading state (spinner) when initial data loads
- Error state with retry button when load fails and no cached data
- Multiple quick-action buttons throughout sections: Create Trip, Add Cost, Add Vehicle, Add Driver

DIALOGS & POPUPS

Offline Banner	Snackbar	Informs user that cached data is being displayed due to network error, shows last updated time, provides Retry and Dismiss actions
Loading Content	Dialog	Full-screen loading spinner with 'Loading' message shown during initial dashboard data fetch
Error Content	Dialog	Full-screen error message with Retry button when dashboard fails to load and no cached data exists
Snackbar Notifications	Snackbar	Brief toast messages for user feedback from navigation or data operations

States / gating: Loading (full screen spinner when no cached data), Error (with retry, shown only if no cache), Offline (banner overlay with cached data), Stale data (visual dot on refresh icon when >15 min old), Empty states per section (Vehicle Status, Driver Status, Trips, Alerts, Financial Overview when no data exists), Refreshing (linear progress bar at top)

5 · Vehicles

vehicles-list-filterchip-en-light.png

Vehicles

Vehicles Vehicles

Browse, filter, and manage the fleet's vehicles. View vehicle status, fuel level, mileage, assigned driver, and current location across all registered vehicles.

FEATURES

- Search vehicles by registration number or make/model
- Filter by vehicle status (Active, Inactive, Maintenance, etc.) with count badges
- Pull-to-refresh to reload vehicle list from server
- Vehicle list cards displaying registration, make/model, fuel %, mileage, assigned driver, last location
- Vehicle type icon badge (truck, van, car, bus, motorcycle, trailer)
- Status badge showing vehicle state (Active/Inactive/Maintenance)
- Click card to navigate to vehicle detail view
- Swipe-to-delete (or long-press delete button) on each vehicle card
- Floating action button (FAB) to add new vehicle when list has content
- Empty state view with CTA to add first vehicle
- Error state with retry action
- Refresh icon in top app bar

DIALOGS & POPUPS

Delete Confirmation Dialog	Confirmation	Confirm deletion of a vehicle with entity name and optional detail (registration)
----------------------------	--------------	---

States / gating: Loading, Error with retry, Empty (no vehicles), Empty with filters applied, Data loaded with 1-2 columns depending on breakpoint (compact=1, medium/expanded=2)

Add Vehicle

AddVehicle Vehicles

Multi-step wizard to register a new vehicle. Capture basic vehicle information, owner details, caretaker assignment, and optionally upload documents.

FEATURES

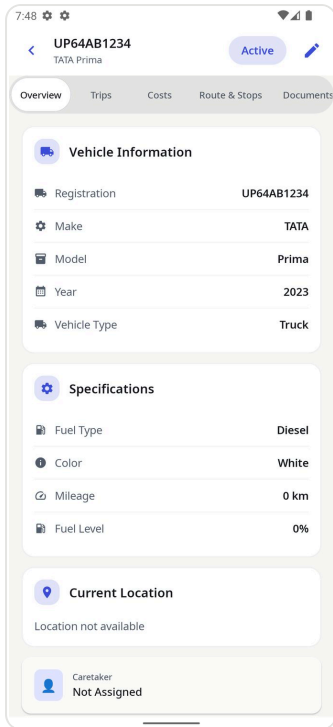

- Step indicator showing 2 steps: Basic Info, Documents
- Step 0 - Basic Info: registration number, make, model, year, color fields
- Side-by-side vehicle type and fuel type dropdowns (fuel filtered by vehicle type from config)
- Owner section with owner name and 10-digit phone number
- Caretaker assignment card with dropdown to select from existing team members
- Refresh and Create Team Member buttons in caretaker card
- Step 1 - Documents: optional document upload cards for 6 document types
- Document types: Registration Certificate, Insurance, PUC Certificate, Fitness Certificate, Road Tax, Permit
- Each document card shows upload status, file name, file size, and expiry date field
- Document upload progress bar with percentage
- Remove (X) button for uploaded documents
- Document info dialog showing supported formats (PDF, JPEG, PNG) and max size before file picker
- Bottom action bar with Previous/Cancel and Next/Register buttons
- Loading overlay during registration
- Form validation: real-time error messages for registration, make, model, year, owner name, owner contact
- Animated slide transitions between steps

DIALOGS & POPUPS

Document Upload Info Dialog	Dialog	Inform user about supported file formats (PDF, JPEG, PNG), max file size, and document tag before triggering file picker
File Picker	Popup Menu	Native file browser to select document file from device

States / gating: Step 0 loaded (basic info with all field states), Step 1 loaded (document list with upload states), Document uploading (progress visible), Saving overlay (registration in progress), Form validation states (error messages)

Screenshot
not captured yet

vehicle-detail-tabs-en-light.png

Vehicle Detail

VehicleDetail Vehicles

Comprehensive vehicle profile with tabbed interface. View and edit vehicle specs, track trips and costs, manage documents, monitor route/stops, and review modification history.

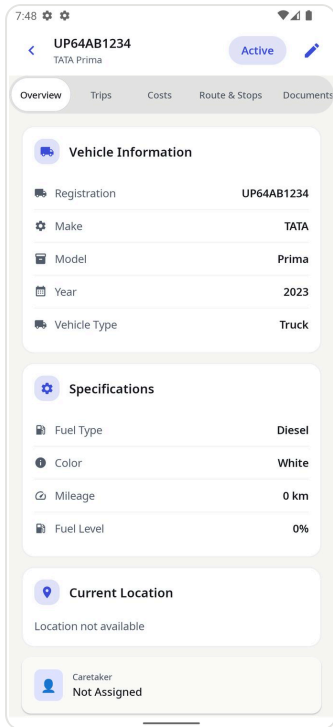

FEATURES

- Top bar shows registration number and make/model (when not in edit mode)
- Status badge clickable to open state change dialog in top app bar
- Edit icon button to enter edit mode
- Back/Close button (shows X in edit mode, back arrow in view mode)
- 6 horizontal tabs: Overview, Trips, Costs, Route & Stops, Documents, History
- Tab bar with scrollable tab selection and HorizontalPager for smooth swiping
- Overview Tab: vehicle info card, specifications, current location (lat/lng with map button), assigned driver, caretaker info, status section, delete button
- Trips Tab: trip summary card (Total, Active, Completed, Planned counts), trip list with scroll-to-load-more
- Costs Tab: maintenance cost list with date range filter sheet, cost type multi-select filter, summary stats, export PDF button
- Route & Stops Tab: active trip info card (trip number, origin → destination, driver, progress %), stops list with sequence/address/status
- Documents Tab: document summary stats (uploaded, missing, expiring), alert banner for expired/expiring docs, all documents list with preview/download/replace actions
- History Tab: vehicle change log with timestamps and change details, pagination with load-more
- Edit Mode: Form with make, model, year, mileage, vehicle type, fuel type, color dropdowns; read-only registration display; driver dropdown; caretaker card
- Bottom bar in edit mode with Cancel and Save Changes buttons
- Loading overlay during save or document upload
- Snackbar messages for actions (preview, download, save, delete)

DIALOGS & POPUPS

State Change Dialog	Dialog	Change vehicle status (Active → Inactive, Maintenance, etc.) with state option list and loading indicator
Delete Confirmation Dialog	Confirmation	Confirm vehicle deletion with registration number shown as entity detail
Costs Filter Bottom Sheet	Bottom Sheet	Filter maintenance costs by date range (from/to fields in DD-MM-YYYY), cost types (multi-select), with Clear All button
Delete Cost Confirmation	Confirmation	Confirm deletion of a maintenance or trip cost entry
Document Upload Dialog	Dialog	Show supported formats (PDF, JPEG, PNG), max size, and document tag before triggering file picker
Maintenance History Dialog	Dialog	Show past maintenance cost entries for the vehicle with loading state

States / gating: Loading initial vehicle data, Error state with retry, Edit mode with unsaved changes, Saving/uploading overlay, Tab content states (loading, error, empty, data loaded) per tab, Date picker active in Costs filter sheet

vehicle-detail-tabs-en-light.png

Vehicle Detail - Overview Tab

Vehicles

At-a-glance vehicle status and key information including specs, location, assigned driver, caretaker, and delete option.

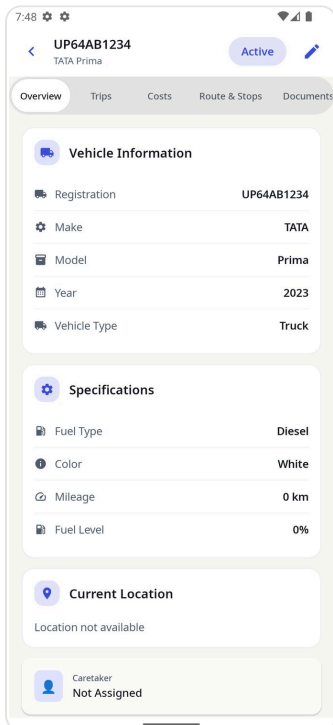

FEATURES

- Vehicle Info section: registration, make, model, year, vehicle type, chassis/engine (if available)
- Specifications section: fuel type, color, mileage (in edit mode: editable)
- Current Location section: latitude, longitude, last update timestamp, 'View Map' button
- Location unavailable message if no GPS data
- Assigned Driver section: driver name, avatar with initials, mobile number with call icon, 'View' button
- Assigned Driver only shown if driver ID is present
- Caretaker Info Card: shows caretaker name, role, avatar, change/edit affordance
- Status section: current vehicle state/status
- Delete button (outlined, error color) at bottom with icon

DIALOGS & POPUPS

None

States / gating: Data loaded (all fields visible), Driver not assigned (section hidden), Location unavailable (location message only), Edit mode (select fields become input fields)

vehicle-detail-tabs-en-light.png

Vehicle Detail - Trips Tab

Vehicles

Track all trips undertaken by the vehicle with aggregated trip statistics and individual trip details.

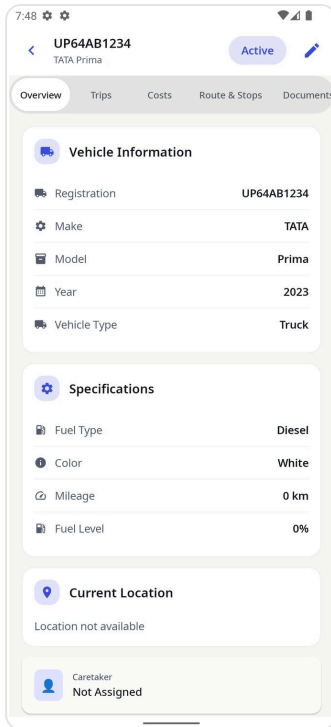

FEATURES

- Trip Summary card: stats in 4 columns (Total trips, Active, Completed, Planned) with colored metric tiles
- Trip List Header: 'Trip History'
- Trip item cards: trip ID/number, origin, destination, status badge, distance, date/time, driver name
- Infinite scroll with load-more trigger at end of list
- Loading indicator while fetching more trips
- Pull-to-refresh to reload trips
- Empty state: 'No trips' message with icon

DIALOGS & POPUPS

None

States / gating: Loading initial trips, Error state with retry, Empty (no trips), Loaded with items, Loading more indicator at end

vehicle-detail-tabs-en-light.png

Vehicle Detail - Costs Tab

Vehicles

Monitor vehicle maintenance and trip costs with filtering, sorting, and PDF export capabilities.

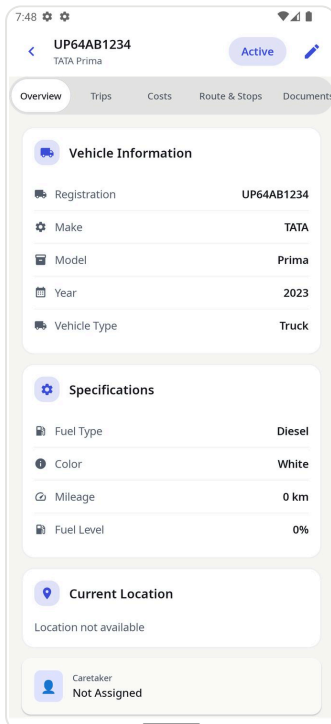

FEATURES

- Costs summary stats: Total amount, count of maintenance/trip costs
- Filter button opens bottom sheet with date range and cost type filters
- Cost list showing individual maintenance and trip cost entries
- Each cost item: date, type, amount, remarks (if any), cost category
- Cost breakdown by type (pie chart or summary)
- Export to PDF button for maintenance costs report
- Delete button on each cost entry (with confirmation)
- Sort options: by date (ascending/descending), by amount
- Costs Filter Bottom Sheet: Date From/To fields (DD-MM-YYYY), Cost Type multi-select (Trip Costs, Maintenance Costs with sub-types), Clear All button
- Loading indicator while fetching cost types or costs
- Empty state when no costs match filter

DIALOGS & POPUPS

Costs Filter Bottom Sheet	Bottom Sheet	Filter by date range and cost type with multi-select checkboxes
Delete Cost Confirmation	Confirmation	Confirm cost entry deletion

States / gating: Loading costs, Error with retry, Empty (no costs), Loaded with items, Costs filter sheet open, Exporting PDF (loading overlay)

vehicle-detail-tabs-en-light.png

Vehicle Detail - Route & Stops Tab

Vehicles

Visualize current trip route, waypoints, and stops in real-time when a trip is active.

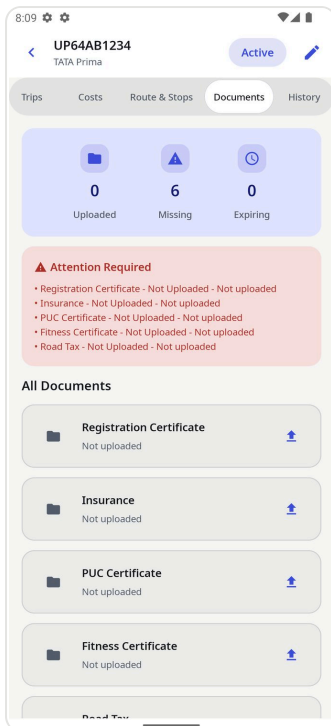

FEATURES

- Active Trip Info card (when hasActiveTrip=true): trip number/ID, origin → destination, driver name, progress percentage (%), progress bar
- Route stops list: each stop shows sequence number, address/location, stop type (pickup/delivery), status (pending/completed), duration
- Map preview or expandable route visualization (if integrated)
- No active trip message when trip not in progress
- Pull-to-refresh to reload route data
- Loading state while fetching route
- Error state with retry option

DIALOGS & POPUPS

None

States / gating: Loading route, Error with retry, No active trip (empty message), Active trip with stops loaded

vehicle-detail-tabs-en-light-scrolled.png

Vehicle Detail - Documents Tab

Vehicles

Manage vehicle regulatory documents (RC, Insurance, PUC, Fitness, Road Tax, Permit) with expiry tracking and upload capability.

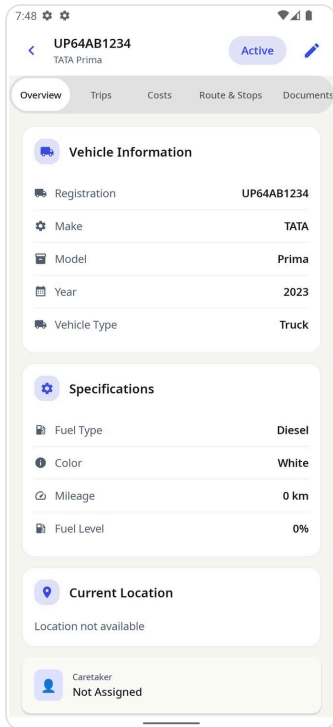

FEATURES

- Documents Summary card: stats (Uploaded count, Missing count, Expiring Soon count) with metric tiles and icons
- Alert banner (red background): lists expiring/expired documents with warning icon and message
- All Documents section: list of 6 document types (RC, Insurance, PUC, Fitness, Road Tax, Permit)
- Each document item: document type name, icon, upload status (uploaded/not uploaded/uploading)
- Uploaded document shows: file name, file size (B/KB/MB), expiry date
- Document card actions: Upload button (or Replace for uploaded), Preview button, Download button, Remove button
- Document expiry date display and edit field
- Upload progress indicator (linear progress bar) while uploading
- Document upload dialog before file picker (shows supported formats, max size, document tag)
- Empty state when no documents uploaded

DIALOGS & POPUPS

Document Upload Dialog	Dialog	Show document info: supported formats (PDF, JPEG, PNG), max file size, and auto-assigned document tag before file picker
File Picker	Popup Menu	Native file browser to select document file

States / gating: Loading documents, Error with retry, Loaded with document list, Uploading document (progress visible), Empty (no documents)

vehicle-detail-tabs-en-light.
png

Vehicle Detail - History Tab

Vehicles

Audit trail of all vehicle modifications (edits, status changes, documents) with timestamps and change details.

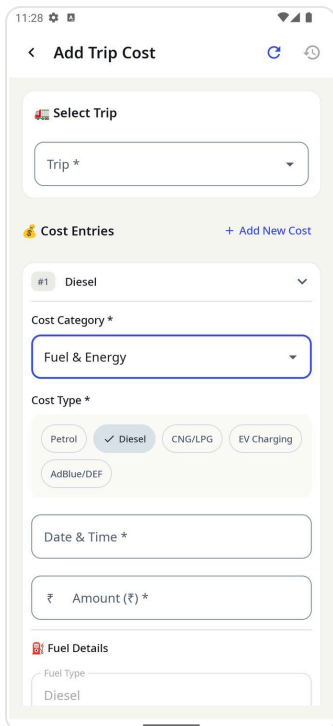

FEATURES

- Chronological history list of vehicle changes (newest first by default)
- Each history item shows: timestamp, change type (edited, status changed, document added), field changed, old value → new value, user who made change
- Infinite scroll with load-more pagination
- Loading indicator while fetching more history
- Empty state: no history message
- Error state with retry

DIALOGS & POPUPS

None

States / gating: Loading history, Error with retry, Empty (no history), Loaded with items, Loading more indicator

cost-type-fleetfilterchip-EN-light.png

Add/Edit Maintenance Cost

MaintenanceCostEntry Vehicles

Log vehicle maintenance expenses with cost type, amount, date, and optional details. Supports batch entry and history review.

FEATURES

- Vehicle Selection dropdown: pre-populated with initialVehicleId if provided from Vehicle Detail
- Multiple cost entry rows: date field, cost type (two-level selector: category → sub-type), amount field, remarks field
- Add Row button to insert new cost entry line
- Remove Row button on each row (X icon)
- Date picker for each cost entry
- Cost type: loads from local database with category grouping (e.g., 'Fuel', 'Maintenance', 'Repair')
- Amount field accepts decimal numbers
- Remarks field for optional notes
- Refresh button in top app bar to reload cost types
- History button in top app bar (enabled when vehicle selected) to view past costs for that vehicle
- Save button: saves all rows as batch
- Cancel/Back button to exit
- Loading overlay while submitting
- Snackbar message: 'X maintenance costs saved' on success
- Form validation: vehicle required, cost type required, amount required and numeric

DIALOGS & POPUPS

Maintenance History Dialog	Dialog	Show past maintenance cost entries for selected vehicle with cost type, amount, date, remarks
-----------------------------------	--------	---

States / gating: Loading initial data, Vehicle selected (form ready), Cost types loading, Saving costs (loading overlay), History dialog open, Empty vehicle selection, Error loading cost types/history

Drivers List

Drivers Drivers

Displays a paginated list of all drivers with quick stats, filtering by status, and search capabilities. Users can select a driver to view details or create a new driver.

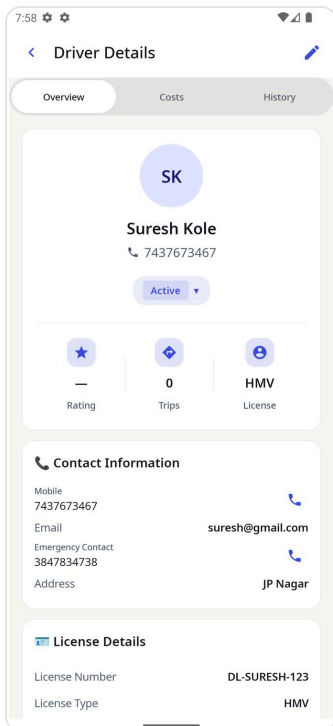

FEATURES

- Refresh button in top app bar to manually refresh driver list
- Search field with real-time filtering by driver name, phone, or license number
- Status filter bar (Active, Inactive, On Leave, Suspended) with count badges
- Driver cards showing avatar, full name, phone icon + number, status badge (color-coded), rating (★), total trips count, license type/number, and current location if available
- Two-column layout on tablet/desktop, single column on mobile
- Pull-to-refresh gesture support
- Floating Action Button (FAB) to add new driver (shown when list has content)
- Empty state with icon, message, and 'Add Driver' action when no drivers exist
- Empty/filtering state when search or filters produce no results
- Error state with retry button (FleetErrorContext.DRIVERS)
- Loading state with spinner and 'Loading...' message
- Delete action on each driver card (triggers confirmation)

DIALOGS & POPUPS

Delete Confirmation	Confirmation	Confirms deletion of a driver before permanent removal
----------------------------	--------------	--

States / gating: loading (initial), refreshing (pull-to-refresh), error (with retry), empty (no drivers or all filtered out), content (driver list with search/filter applied)

driver-detail-tabs-en-light-fixed.png

Driver Detail

DriverDetail Drivers

Displays comprehensive driver information across three tabs (Overview, Costs, History) with edit mode and status change capability. Shows personal, license, contact, and financial data.

FEATURES

- Top app bar with 'Driver Detail' / 'Edit Driver' title, back button, and edit icon (view mode only)
- Three-tab navigation: Overview (basic info), Costs (earnings/deductions), History (audit log)
- Overview tab: header card with avatar, full name, phone, clickable status badge dropdown, quick stats (rating, total trips, license type), contact section (mobile/email/emergency contact/address), license section (number/type/expiry), personal section (DOB/blood group/joining date), metadata section (driver ID/added by/created/updated dates), caretaker assignment card, delete button
- Costs tab: hero card (earnings/deductions/net amount in three-column layout with entry count badge and PDF export button), cost breakdown by group (Salary/Incentives/Deductions/Other) with collapsible sections showing individual cost entries with colored indicators and trip links, expand/collapse all button, filter button, active filters banner (month/date range), FAB to add cost, PDF export indicator overlay
- History tab: reusable HistoryTabContent with paginated audit history items and load-more capability
- Edit mode button bar: Cancel and Save buttons (bottom sticky), disabled Save when no changes (canSave flag), loading indicator during save
- Status change dialog triggered by clicking status badge in Overview tab
- Bottom sheets for cost filtering (date range / month picker with FleetDatePicker)
- Permission gating: Costs tab hidden if user lacks cost-viewing permission
- Edit mode toggles all read-only fields to editable (first/last name, mobile, email, license number/type/expiry, DOB, blood group, address, emergency contact, joining date, caretaker assignment)

DIALOGS & POPUPS

Delete Confirmation	Confirmation	Confirms deletion of the driver with named message (driver's full name included)
Status Change Dialog	Dialog	Allows changing driver status with valid transition options (triggered from status badge click)
Costs Filter Sheet	Bottom Sheet	Filters costs by month (YYYY-MM) or date range (DD-MM-YYYY), with clear-all and apply buttons
PDF Export Progress	Snackbar	Shows progress overlay with spinner while exporting costs to PDF
Saving Overlay	Snackbar	Shows progress overlay with spinner while saving driver changes

States / gating: loading (initial detail fetch), error (with retry), content (driver loaded), edit mode (form fields unlocked with bottom action bar), saving (with overlay), exporting PDF (with overlay), loading costs/history (within tabs)

Create Driver

CreateDriver Drivers

Multi-section form to onboard a new driver with personal details, credentials, license information, and caretaker assignment. Validates all required fields before submission.

FEATURES

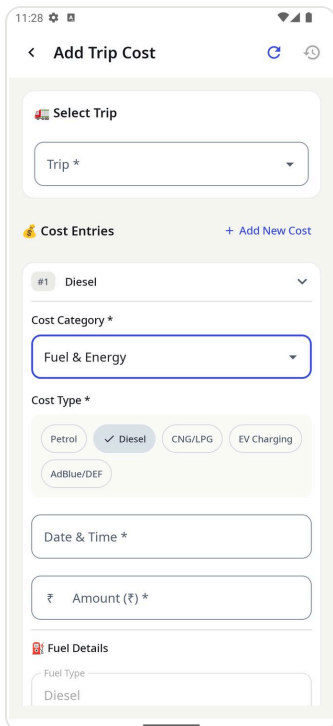

- Top app bar with 'Create Driver' title and back button
- Vertically scrollable form with sticky bottom action bar (Cancel, Create buttons)
- Basic Information section: first name + last name (side-by-side), mobile (10-digit validated), password (masked input), email
- License Details section: license number, license type selector (chips: HCV/LCV/MC), license expiry date picker (must be future date)
- Personal Details section: date of birth picker (maxDate = 18 years ago, initialDisplayDate for convenience), blood group dropdown (A+, A-, B+, B-, O+, O-, AB+, AB-), address field, emergency contact (10-digit phone), joining date picker (optional)
- Caretaker Assignment section: reusable CaretakerSectionCard with dropdown selector and refresh button
- Form validation with per-field error messages (red text below each field)
- Save button disabled until canSubmit flag is true (all required fields filled)
- Loading state with modal spinner overlay + 'Creating...' message
- Snackbar notifications for errors or success (e.g., 'Driver created successfully')
- Centered form on wide screens (tablet/desktop) with max content width

DIALOGS & POPUPS

Loading Overlay	Snackbar	Shows progress indicator with 'Creating...' text during driver creation
-----------------	----------	---

States / gating: *idle (ready to input), validating (per-field checks), saving (isSaving=true with overlay), error (field-level errors shown inline, or snackbar for server errors)*

cost-type-fleetfilterchip-EN-light.png

Driver Cost Entry

DriverCostEntry Drivers

Bulk cost entry form for recording multiple driver expenses (salary, incentives, deductions, other) in a single session. Allows cost date/type/amount entry with trip linking.

FEATURES

- Top app bar with 'Driver Costs' title, back button, refresh cost-types button (with spinner), history button (disabled until driver selected)
- Driver Selection section: ExposedDropDownMenuBox with two-line options (name + mobile) and avatar preview
- Driver Details card (when selected): shows name, mobile, license number, active/inactive status badge in colored container
- Cost Entry Rows section: title + add-row button
- Multiple cost entry rows (reversed order, newest on top): expandable cards with #index badge, cost type label, deduction badge (red), amount preview, expand/collapse chevron, delete button (if more than 1 row)
- Expanded row details: two-level cost type selector (category + type), custom cost name field (for 'Other' type), date/time picker (FleetDateTimePicker with minDate=driver joining date, maxDate=tomorrow), amount field (decimal input with ₹ prefix, -₹ for deductions), notes field (optional)
- Submit button (Save All Costs) disabled until canSave flag, with loading state and button text change ('Saving...')
- Cost history dialog: triggered from history button, shows list of recent costs for selected driver with date/type/amount/notes, loading spinner, empty message
- Centered form on wide screens with max content width
- Full-page loading state (before drivers/cost types loaded)

DIALOGS & POPUPS

Cost History Dialog	Dialog	Modal showing list of previously entered costs for the selected driver with cost label, date, deduction badge, amount, and notes
Date/Time Picker	Date Picker	Selects cost entry date with constraints (between driver joining date and tomorrow) and time

States / gating: loading data (`isLoadingData=true`, spinner), no driver selected (driver section empty), driver selected (details card visible, cost rows enabled), saving (`isSaving=true`, button disabled), refreshing cost types (spinner in top action)

7 · Trips & Cost Entry

Screenshot
not captured yet

Trips

Trips

Trips

Browse and manage all trips with search and status filtering. View trip summaries including route, vehicle, driver, and progress indicators for active trips.

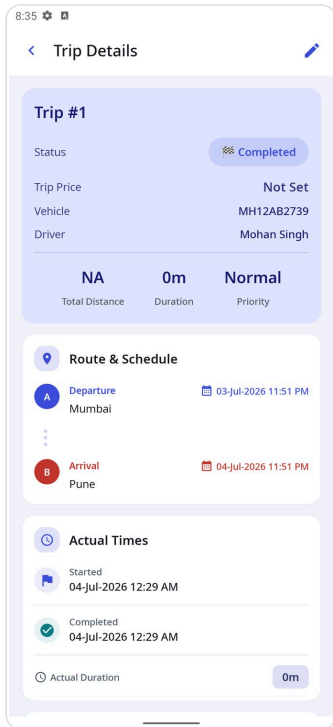

FEATURES

- Search field to filter trips by text query
- Status filter bar showing trip counts (Planned, On Route, Completed, Cancelled)
- Trip card list showing trip number, vehicle registration, driver name, and status badge
- Route visualization with start/end locations and current location (for on-route trips)
- Distance, duration, and cost metrics per trip
- Customer name and cargo type display
- Progress indicator bar for on-route trips showing percentage and remaining distance
- Pull-to-refresh capability
- Empty state with action to create first trip
- Error state with retry button
- Floating action button to create new trip (when content exists)
- Top bar with refresh button and trip count

DIALOGS & POPUPS

None

States / gating: Loading spinner with message; Error state with retry; Empty state with optional 'Create Trip' action; Responsive grid (1 column on mobile, 2 on tablet/desktop)

tripdetail-emoji-05-route-act
ualtimes-EN.png

Trip Detail

TripDetail Trips

View comprehensive trip information with tabbed sections for route schedule, actual times, cargo/customer details, costs, and payments (role-based). Edit mode allows updating trip fields.

FEATURES

- Trip header card showing trip number, status (clickable to change), vehicle, driver, distance, duration, priority, and trip price (Owner/GM only)
- Route & Schedule section with departure/arrival locations, dates, and times with visual markers (A/B labels)
- Actual Times section (visible when times recorded) showing actual start/end times and calculated duration
- Cargo & Customer section with cargo type, weight, description, customer name, contact number (clickable phone chip), and trip price
- Additional Info section showing trip ID, notes, and creation date
- Trip Costs section with total cost header, add/export PDF buttons, and flat cost list with click-to-view-details dialog
- Trip Payments section (Owner/GM only) showing payment summary with trip price, total paid, pending amount, progress bar, and payment history list
- Edit button in top bar to enter edit mode
- Edit mode with cancel/save buttons in bottom bar
- Edit mode allows updating vehicle, driver, start/end locations, dates, cargo type/weight, customer selection, notes, and trip price
- Cancel Trip button (destructive, only for Planned trips)
- Status change capability via state dialog

DIALOGS & POPUPS

Trip Cancellation Confirmation	Confirmation	Confirm destructive action to cancel a planned trip with warning message
Trip Status Change Dialog	Dialog	Select new trip status from available state transitions with loading indicator
Cost Detail Dialog	Dialog	View full cost entry details when cost list item is clicked
Customer Selection Bottom Sheet	Bottom Sheet	Search and select a customer or create a new customer in edit mode

States / gating: Loading spinner with message; Error state with retry button; Edit mode with Cancel/Save buttons; Saving overlay; PDF export overlay; Empty costs and payments states with action buttons

Screenshot
not captured yet

Create Trip

CreateTrip Trips

Create a new trip by filling out scheduled details, vehicle/driver assignment, route, cargo info, customer, and optional pricing. Shows form completion progress in header.

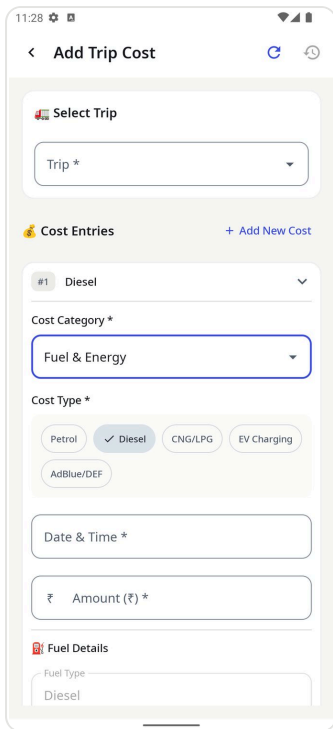

FEATURES

- Form completion progress indicator in top bar (percentage-based, color-coded)
- Schedule section with departure date/time picker and arrival date/time picker
- Vehicle selection dropdown showing vehicle registration, make/model/year, occupancy status, and conflicting trip times (sorted available-first)
- Driver selection dropdown showing driver name, mobile, occupancy status, and conflicting trip times (sorted available-first)
- Route section with start location autocomplete, end location autocomplete, and auto-calculated estimated distance with travel time
- Location search dropdown predictions with place suggestions
- Cargo section with cargo type dropdown, loading weight input with unit selector (KG/MT), cargo description textarea, and priority dropdown (High/Normal/Low)
- Customer selection with refresh button, inline select/clear actions, and bottom sheet for search/add
- Delivery/Consignee section with name, phone, email fields (distinct from billing customer)
- Pricing section with trip price input (Owner/GM only)
- Notes section with freeform textarea
- Validation summary bar at bottom showing error count when form incomplete
- Cancel and Create buttons with loading state and disabled state based on form validation

DIALOGS & POPUPS

Customer Selection Bottom Sheet	Bottom Sheet	Search for and select an existing customer or navigate to add a new customer
Vehicle Dropdown	Popup Menu	Select vehicle with rich options showing occupancy and conflicting trip times
Driver Dropdown	Popup Menu	Select driver with rich options showing occupancy and conflicting trip times
Cargo Type Dropdown	Popup Menu	Select cargo type from predefined list
Priority Dropdown	Popup Menu	Select trip priority (High/Normal/Low)
Location Predictions Dropdown	Popup Menu	Show place autocomplete suggestions for start/end locations

States / gating: Loading data spinner; Form validation with error highlighting; Progress bar color-coded by completion percentage; Disabled Save button until core fields filled

cost-type-fleetfilterchip-EN-light.png

Trip Cost Entry

TripCostEntry Trips

Record trip costs with multi-row entry interface. Supports multiple cost types (Fuel with detailed tracking, Maintenance, Toll, Other) with date/time, amount, and optional fuel details. Bulk save multiple entries per trip.

FEATURES

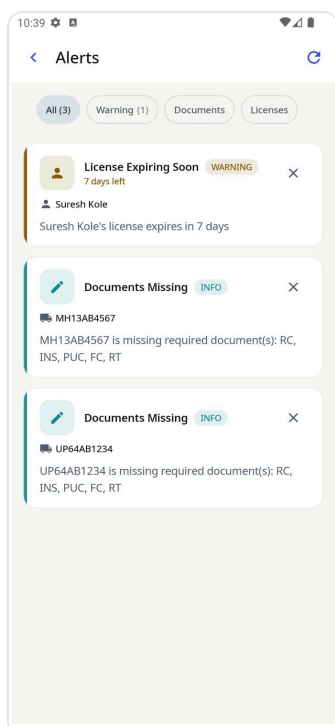

- Trip selection dropdown showing route (Start → End), vehicle number, and scheduled date
- Trip details card showing vehicle number, trip date, route with location markers, and status badge
- Cost entries header with '+ Add New' button to add expandable cost rows
- Expandable cost entry rows (reversed order, newest on top) with collapsed header showing cost type, amount, and date
- Cost type two-level selector with category dropdown and chip-based cost type selection
- Custom cost type name input for 'Other' cost type
- Date & Time picker with trip date constraints (cost must be within trip date range)
- Amount input field with rupee symbol prefix
- Fuel-specific fields (shown when fuel cost type selected): fuel type (read-only, auto-populated), fuel quantity, fuel rate, km per liter
- Calculated fuel total display (quantity × rate)
- Notes textarea for cost remarks
- Delete button per row (disabled when only one row exists)
- Save Costs button (bulk submit all entries)
- Cost History dialog accessible from top bar showing previous costs for selected trip
- Refresh cost types button in top bar
- Loading state with spinner
- Empty states for no trips and no costs in history

DIALOGS & POPUPS

Cost History Dialog	Dialog	View previously recorded costs for the selected trip with totals and filtering
Trip Dropdown	Popup Menu	Select trip from list with route and date information
Cost Type Selector	Dialog	Two-level category/type selector with category dropdown and scrollable cost type chips
Date Time Picker	Date Picker	Select cost date and time with trip date range constraints

States / gating: Loading data spinner; Trip selection required before cost entry; Date constraints enforced (cost date $\geq$ trip start, $\leq$ trip end or tomorrow for completed trips); Validation with error messages per field; Bulk save disabled until at least trip selected and one valid entry

8 · Alerts

alerts-severity-accent-EN-light.png

Alerts List

AlertsList Alerts

Display all alerts filtered by priority and type. Users can filter alerts by severity level (Critical, Warning, Info) or alert category (Documents, Licenses) and dismiss individual alerts.

FEATURES

- Top app bar with back button to navigate back from the alerts screen
- Refresh button in the top app bar that reloads all alerts; shows a loading spinner during refresh
- Filter bar with dynamic filter chips: All (total count), Critical (if count > 0), Warning (if count > 0), Documents, and Licenses
- Filter chips display the count of matching alerts and become selected when tapped
- Responsive alert card list: single column on compact layouts, two columns on medium/expanded layouts
- Each alert card has a 4dp left accent bar colored by severity: error red (Critical), warning amber (Warning), or info teal (Info)
- Alert card displays: alert icon (type-differentiated glyph in a severity-tinted box), alert title, priority chip, and alert message
- Days until expiry badge displayed when daysUntilExpiry is set: red if expired (X days overdue), amber if <= 7 days left, teal if > 7 days left
- Vehicle registration number displayed with a truck icon for Document Expiry and Missing Documents alert types
- Driver name displayed with a driver icon for License Expiry alert type
- Dismiss button (X icon) on each alert card to remove the alert from the list
- Empty state with check circle icon shown when no alerts match the selected filter
- Loading state shown during initial alert load with a loading message
- Error state with retry button displayed when alert loading fails

DIALOGS & POPUPS

Snackbar (Refresh Success)	Snackbar	Confirm that alerts have been successfully refreshed with the message 'Alerts refreshed'
Snackbar (Refresh Error)	Snackbar	Show error message when alert refresh fails: 'Failed to refresh: [error message]'
Error Dialog (with Retry)	Dialog	Display full error details and provide a Retry button when initial alert load fails

States / gating: Loading: Initial load shows a centered loading message. Error: If load fails and no alerts exist, full error screen with retry button is shown. Empty: When filtered alert list has no matching items, empty state card displays. Refresh: Tap on refresh icon shows spinner in action bar until refresh completes. Permission gating: None at this screen level (backend handles authorization).

Screenshot
not captured yet

Live Maps

Maps Navigation

Display live GPS positions of fleet vehicles over a map interface with real-time WebSocket updates. Users can view vehicle locations, statuses, and details in a searchable vehicle list.

FEATURES

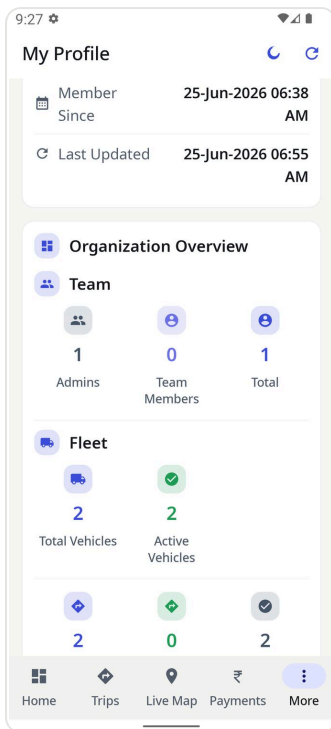

- Top app bar with title 'Maps' and two action icons (live tracking toggle + refresh)
- Live tracking toggle icon button (primary colored when enabled, secondary when disabled)
- Refresh button to reload vehicle list and reconnect live feed
- Map placeholder area showing icon and text (actual map SDK integration required)
- Bottom sheet vehicle list with drag-handle pill indicator
- Live connection status indicator (colored dot + text label: Connected/Connecting/Disconnected/Idle)
- Vehicle statistics row showing total count and status breakdown: count of Moving (blue), Stopped/Idle (secondary), and Offline (red) vehicles
- Searchable/scrollable vehicle list displaying each vehicle's registration number, driver name, current address, and speed (if moving)
- Vehicle status indicator (colored circle) next to each vehicle entry
- Vehicle selection via click (highlights with semi-transparent primary container background)
- Individual vehicle detail navigation via chevron button (›) on each row
- Empty state message when no vehicles are available
- Responsive layout: 1-up on compact, 2-up grid on medium/large breakpoints
- Loading state with spinner overlay
- Error state with message and retry button
- Snackbar notifications for system messages
- Speed display in km/h for moving vehicles

DIALOGS & POPUPS

Snackbar	Snackbar	Display temporary messages (connection errors, refresh status, etc.)
-----------------	----------	--

States / gating: Loading state (spinner full-screen), Error state (with error message and retry action), Empty state (no vehicles returned), Live connection states (Idle / Connecting / Connected / Disconnected). Permission-gating not applicable; backend is authority for vehicle list access. WebSocket disconnection graceful: seeded markers remain visible with disconnected status.

10 · Team & Roles

profile-team-tiles-admins-members-total.png

Team Members List

TeamList Team

Browse and manage all team members with filtering, search, and role-based action menus. Displays member count, status badges, and permission-gated controls for editing, toggling access, resetting passwords, and deleting members.

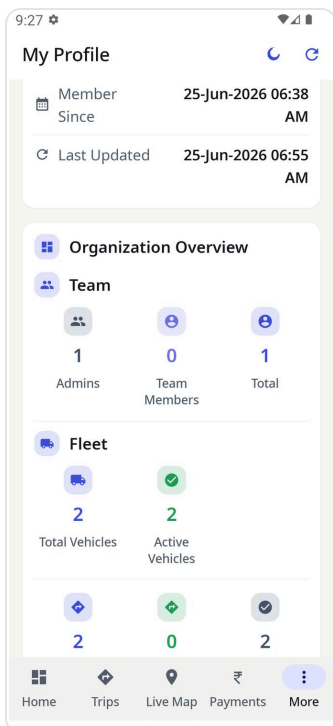

FEATURES

- Top app bar with title, member count, add member button (if permission exists), and refresh button
- Pull-to-refresh gesture support for refreshing team members
- Filter tabs: All, Admins, Users to filter members by role
- Search field to find team members by name, email, or other attributes
- Team member cards in responsive grid (1 column on mobile, 2 on tablet/web)
- Member avatar with role-based color coding (Owner=tertiary, Admin=primary, User=secondary)
- Member card displays: full name, role badge, active/inactive status, email, mobile number
- Three-dot actions menu per member: toggle active/disable, reset password, delete
- Loading spinner while fetching team members
- Empty state with search/add member guidance when no results
- Error state with retry button for failed requests
- Snackbar notifications for success/error messages

DIALOGS & POPUPS

Reset Password Dialog	Dialog	Allows admin to set a new password for a team member; includes password strength and confirmation match validation
Delete Confirmation Dialog	Confirmation	Confirms deletion of a team member before removing from system
Disable Access Confirmation Dialog	Confirmation	Warns user before disabling (deactivating) a team member's access to the system
Actions Dropdown Menu	Popup Menu	Context menu with options to toggle active status, reset password, or delete member based on permissions

States / gating: Loading (spinner with 'Loading team members' message); Error (with retry button and `FleetErrorContext.TEAM`); Empty (no members found, shows icon + 'No team members yet' or 'No results found' if searching); Refreshing (pull-to-refresh indicator on top bar); Permission-gated buttons (add member, edit, toggle, reset, delete disabled per `canCreateTeamMember`, `canEdit`, `canToggleActive`, `canResetPassword`, `canDelete` flags); Cannot act on self (`member.id !== currentUserId`)

profile-team-tiles-admins-members-total.png

Create Team Member

CreateTeamMember Team

Form to add a new team member with role assignment and credentials. IAM role selection (admin, user) gates available permissions. Validates personal info, contact details, and password. Can optionally exclude elevated roles (e.g., General Manager) from selection.

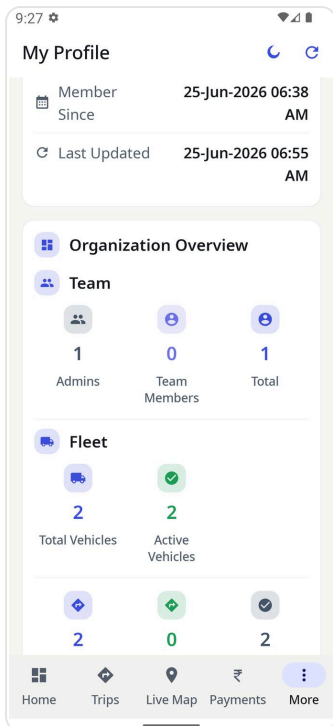

FEATURES

- Top app bar with 'Add Team Member' title and back button
- Role selection section: displays available IAM roles as selectable cards with icon, title, and description
- Role loading indicator (spinner) while fetching roles from API
- Personal Information section with first name and last name fields side-by-side on wider screens
- Email field with validation for proper email format
- Mobile field accepting 10 digits only (Indian phone validation)
- Password section with password field and confirm password field
- Inline validation errors appear after user types (required fields gated by submit button)
- Password mismatch error when confirm password differs from password
- Error message card displayed prominently if submission fails
- Create button with loading spinner, disabled until all fields valid
- Scrollable form on mobile for access to all sections
- Form width constrained on tablet/web for better UX
- Keyboard action (Done) on final field triggers submission if valid

DIALOGS & POPUPS

Snackbar Notification	Snackbar	Displays success or error messages (e.g., 'Team member created' or validation errors)
------------------------------	----------	---

States / gating: Loading (circular progress indicator while roles fetch); Roles Loading (spinner in role section while API populates available roles); Form Submitting (Create button shows spinner and disabled state); Error State (red error card with message and validation inline errors per field); Empty Fields (submit button disabled until all required fields filled); Password Validation (confirm password match and backend policy enforcement)

profile-team-tiles-admins-members-total.png

Team Member Detail

TeamMemberDetail Team

Display detailed view of a team member with contact info, role, and active status. Supports edit mode (if authorized) to update name, email, mobile, role assignment, and access status. Read-only for members without edit permission or when viewing self.

FEATURES

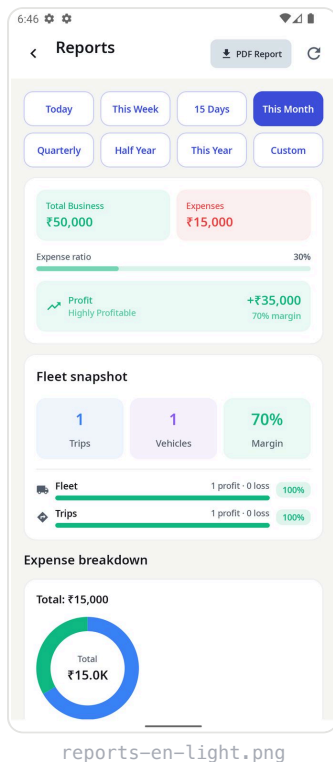

- Top app bar with 'Team Member Detail' or 'Edit Member' title (dynamic based on mode)
- Back/Cancel button in top left (toggles between detail and edit modes)
- Edit button in top right (only in view mode, only if user has permission and not viewing self)
- Large avatar with role-based color (displayed above member name)
- Member's full name as headline
- Role badge with color coding (Owner, Admin, or User)
- Status badge (Active/Inactive with colored dot indicator)
- Contact Information card: email with icon, mobile number with clickable phone link
- Additional Information card: member ID, created date in human-readable format
- Edit Mode: First name and last name fields with inline validation
- Edit Mode: Email field with validation
- Edit Mode: Mobile field accepting 10 digits only
- Edit Mode: Role selection chips/buttons (displayed as column if 3+ roles, row if 2, with full-width option on smaller screens)
- Edit Mode: Role permission preview card showing selected role's description and permissions
- Edit Mode: Active Status toggle switch with hint text (Access enabled/disabled)
- Edit Mode: Save Changes button (disabled until all fields valid) with loading spinner
- Edit Mode: Cancel button to exit without saving
- Loading spinner with 'Loading team member' message on initial load
- Error state with retry button on failed member fetch
- Scrollable content on mobile

DIALOGS & POPUPS

Snackbar Notification	Snackbar	Shows success (member updated) or error messages during edit or load
------------------------------	----------	--

States / gating: Loading (spinner with 'Loading team member' message); Error (with retry and `FleetErrorContext.TEAM`); View Mode (read-only display with optional Edit button if permission and not self); Edit Mode (all editable fields + Save/Cancel buttons, disabled until changes valid); Saving (Save button shows spinner, disabled state); Validation Errors (inline per field using `ValidationUtils`: first name, last name, email, mobile); Self-Guard (cannot edit own record, `isSelf` property prevents role/status changes); Permission-gated (`canEdit`, `canChangeRole`, `canToggleActive` gates respective UI)

11 · Reports & Profit / Loss

Reports Hub

Reports Reports

Central dashboard displaying a P&L summary with period selection, expense breakdown, vehicle insights, and quick-access tiles to all detailed report types.

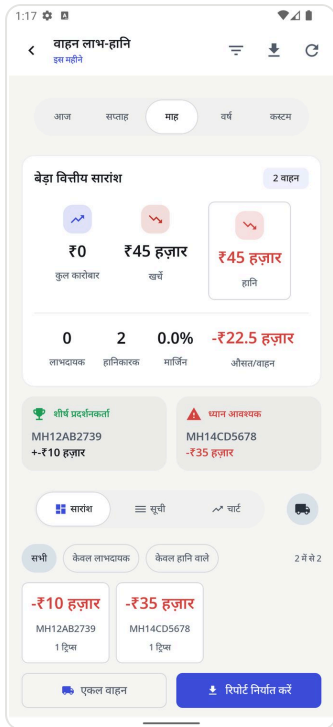

FEATURES

- Period selector pill (Today, Weekly, 15 Days, Monthly, Quarterly, Half Year, Yearly, Custom) in top app bar with dropdown menu
- Financial hero card showing total revenue, expenses, and net profit with profit margin gauge
- Fleet snapshot metrics (number of profitable/loss-making vehicles with KPIs)
- Expense breakdown pie chart showing cost distribution by category
- Vehicle insights section listing top-performing vehicle and loss-making vehicles
- Detailed reports section with tiles for Vehicle P&L, Trip P&L, Consolidated P&L, Customer P&L, and Cost Analysis
- Maintenance cost, trip cost, and driver cost report tiles for accessing specialized reports
- Combined report tile for multi-report view
- PDF export button (icon-only download action in top bar) when summary data is available
- Refresh button to reload data
- Linear progress indicator overlay when loading with summary already displayed
- Error banner with retry action for failed data loads

DIALOGS & POPUPS

Date Range Picker Dialog	Dialog	Select custom start and end dates (DD-MM-YYYY format) for the custom period option
Period Selector Dropdown Menu	Popup Menu	Select from 8 predefined and custom periods with checkmark indicator for current selection
PDF Export Handler	Dialog	Handles real PDF generation and displays system open/share dialog for the exported P&L report
Snackbar Toast	Snackbar	Show export success path, export errors, or API errors as dismissible toast notifications

States / gating: Loading state (full screen before initial load), loading overlay (linear progress when refreshing with data), empty state when no data available, error state with inline banner and retry button, normal state with all report cards and summary data

Vehicle Profit & Loss

VehicleProfitLoss Reports

Multi-modal screen enabling fleet-wide P&L analysis by default with fleet overview (all vehicles) or drill-down to single-vehicle detailed reports with customizable views.

FEATURES

- Fleet Overview mode (default): shows aggregated P&L for all vehicles in the selected period
- Fleet Summary KPI card with total vehicles, profitable count, loss-making count, revenue, expenses, net profit, and average profit per vehicle
- Top/Worst performers card showing highest and lowest profit vehicles
- Period selection tabs (Today, Week, Month, Year, Custom) with date range display
- View mode toggle (Summary/List/Chart) with three distinct data presentation modes
- Chart view showing top 10 vehicles with bar/pie chart type selector
- Summary grid showing all vehicles with key metrics at a glance
- List view with individual vehicle P&L cards showing registration number, profit/loss status, revenue, expenses, and trip count
- P&L status filter pills (All/Profitable/Loss Making) for filtered results
- Sorting options (Profit High-Low, Revenue, Expenses, Trip Count)
- Vehicle filter button and multi-vehicle selection via bottom sheet
- Single-vehicle mode accessible via dropdown selector or 'Single Vehicle' button
- Single vehicle step wizard (3 steps: Select Vehicle → Select Period → View Results)
- Export options dialog (PDF/CSV/Excel format selection)
- Recent vehicles list for quick one-tap access
- Search field in vehicle selector to filter by registration, make/model, or driver name
- Loading and export-generating overlay dialogs
- Filter badge on toolbar showing active filter count

DIALOGS & POPUPS

Vehicle Selector Bottom Sheet	Bottom Sheet	Search and select a single vehicle from available fleet; shows recent vehicles and all vehicles with search filtering
Vehicle Filter Bottom Sheet	Bottom Sheet	Multi-select vehicles for fleet overview mode with Select All / Clear All controls and search
Export Options Dialog	Dialog	Choose export format (PDF, CSV, Excel) before generating report
Loading Overlay	Dialog	Semitransparent overlay with circular progress indicator and 'Updating' label during data refresh
Export Generating Overlay	Dialog	Semitransparent overlay with progress indicator and 'Generating' label during PDF/export generation
Snackbar Toast	Snackbar	Show export completion message, export errors, or API errors

States / gating: Initial loading (full-screen LoadingContent), no vehicles available (empty state card), fleet overview mode with data (summary KPI card, performers, view modes), fleet overview error state (FleetErrorCard with retry and single-vehicle fallback), fleet overview empty P&L (EmptyPLDataContent when vehicles exist but no P&L for period), single vehicle mode with results, single vehicle mode loading, single vehicle mode error

Trip Profit & Loss

TripProfitLoss Reports

Trip-centric P&L analysis enabling date range selection, trip filtering by attributes, and multi-trip profitability reporting.

FEATURES

- Date range input fields (From/To) with DD-MM-YYYY format and inline validation
- Load Trips button to fetch trips for selected date range
- Trip list with search field to filter by trip ID, location, vehicle, or customer name
- Trip selection checkboxes with Select All / Clear buttons
- Selected trip count display in header
- Generate Report button (enabled when trips selected)
- Trip P&L results table with columns: Trip ID, Vehicle, From-To location, Customer, Date, Revenue, Expenses, Net Profit, Margin %, P&L Status badge
- Sorting dropdown (Profit High-Low, Profit Low-High, Date Newest, Date Oldest, Revenue High-Low)
- P&L Status filter pills (All/Profitable Only/Loss Making Only)
- Summary statistics: total profitable trips, loss-making trips, break-even trips, total revenue, expenses, net profit, average margin
- Inline date validation with error messages for invalid dates or out-of-order ranges
- Refresh button to reload data
- Loading overlay during trips fetch or report generation

DIALOGS & POPUPS

Loading Overlay	Dialog	Semitransparent overlay with circular progress and 'Loading' label during trips fetch or report generation
Snackbar Toast	Snackbar	Show validation errors, API errors, or report generation status

States / gating: Empty initial state with date inputs, loading trips state, trips loaded with selection UI, error state (inline error banner), results state with trip P&L table

Cost Analysis

CostAnalysis Reports

Analyze cost distribution across trip and maintenance cost types over a date range with multi-select filtering.

FEATURES

- Date range input fields (From/To) with DD-MM-YYYY format and inline validation
- Error messages for invalid dates and end-before-start date ranges
- Dynamic cost type selection from database (grouped by trip costs and maintenance costs)
- Cost type checkboxes with Select All / Clear All controls
- Fallback to static cost types if dynamic types unavailable
- Generate Report button (enabled when dates valid and cost types selected)
- Cost breakdown results table with columns: Cost Type, Count, Total Amount, Average per Entry
- Summary metrics: total cost amount, total entry count
- Pie/bar chart visualization of cost distribution
- Empty state when no results yet generated
- Inline error banner for API or validation failures
- Refresh button

DIALOGS & POPUPS

Snackbar Toast	Snackbar	Show validation errors or API errors
----------------	----------	--------------------------------------

States / gating: Empty initial state (no generation yet), results state with cost breakdown, error state with inline error banner

Consolidated P&L

ConsolidatedPL Reports

Multi-dimensional P&L segmentation by vehicle and cost type with period breakdown options (day/week/month).

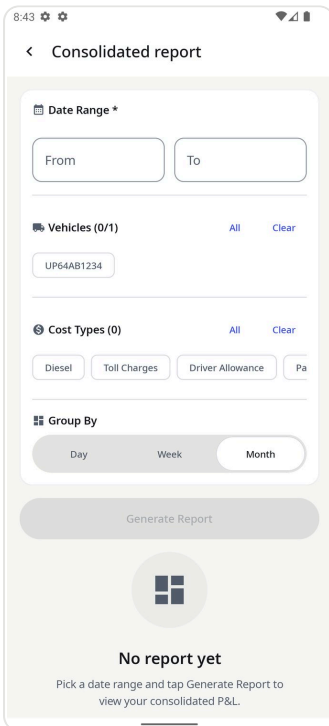

FEATURES

- Vehicle selection with checkboxes, Select All/Clear All, and search filtering
- Cost type selection (TC-001-002 Diesel, TC-002-001 Toll, etc.) with structured IDs and display labels
- Date range inputs (From/To DD-MM-YYYY) with inline validation
- Group By dropdown (Day/Week/Month) to segment results by time period
- Generate Report button (enabled when all filters valid)
- Consolidated summary card showing aggregate P&L totals
- Period breakdown card with time-series segmentation (breakdown by day/week/month)
- Vehicle summary section showing P&L per vehicle
- Cost contribution breakdown by selected cost types
- Inline date validation with error messages and range check
- Empty state when no report generated yet

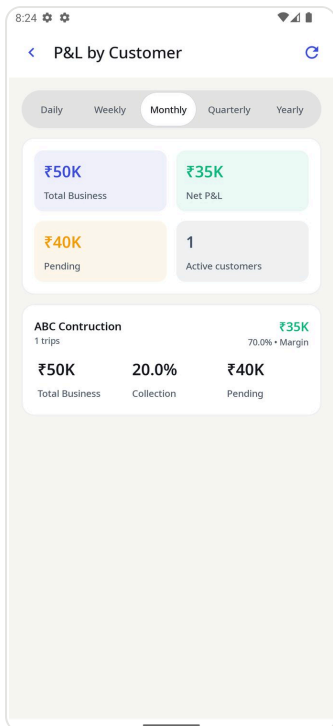

DIALOGS & POPUPS

Snackbar Toast	Snackbar	Show validation or API errors
----------------	----------	-------------------------------

States / gating: Empty initial state (no report generated), results state with consolidated summary and breakdowns, error state with inline error banner

Customers List

Customers Customers

Displays all active customers in a paginated, searchable list. Users can view company names, contact persons, phone numbers, and GST numbers at a glance, and navigate to individual customer details.

FEATURES

- Search customers by name, phone, or company info with real-time filtering
- Pull-to-refresh to reload the customer list
- Display count of total customers in top app bar
- Customer cards show: company name, contact person, phone icon, GST number (if available), and active/inactive status badge
- Responsive grid layout: 1-up on phones, 2-up on tablets/web (capped width on expanded screens)
- Infinite scroll with load-more pagination
- FAB button to add new customer (visible when list has content)
- Empty state with call-to-action to create first customer
- Error state with retry button
- Refresh icon in top bar (replaced by spinner when loading)
- Tap any customer card to view detailed profile

DIALOGS & POPUPS

None

States / gating: Loading (initial), Refreshing, Empty (with CTA), Error with retry, Paginated content load

Customer Detail

CustomerDetail Customers

Comprehensive profile view for a single customer with tabbed interface showing overview, trips, payments (Owner/GM only), and financials (Owner/GM only). Supports edit mode to modify customer info.

FEATURES

- Four-tab tabbed interface: Overview, Trips, Payments, Financials (last two only for Owner/GM)
- Edit mode toggle (pencil icon) to modify customer fields
- Cancel/back button switches behavior based on edit mode
- Overview tab: hero card with company name, contact person, active status toggle; Contact Details section with clickable phone numbers; Business Details section showing GST, address, notes
- Trips tab: summary card (total trips, completed, active, revenue, pending amounts) with export PDF button; trip state filter chips (All, Planned, On Route, Completed, Cancelled); infinite-scrolling trip list with load-more; each trip row shows: trip ID, vehicle registration, route (start→end), dates, price/paid/due amounts, payment status badge; tap to navigate to trip detail
- Payments tab (Owner/GM only): collapsible search bar for filtering by trip ID, mode, amount, receipt/reference; payment mode filter chips; payment summary card; monthly-grouped payment list; each payment shows: mode icon, trip ID, amount, date/time, payment type badge, receipt/reference numbers if available; load-more pagination
- Financials tab (Owner/GM only): period selector with filter chips (Monthly, Quarterly, Yearly, Custom Range); custom date range display; P&L card showing revenue, expenses, driver costs, net profit, margin; trip summary metrics; payment status card (received/pending); period breakdown with per-period revenue/costs/profit; top vehicles section; export PDF button
- Edit mode: Bottom bar with Cancel and Save/Update buttons; form sections for company details, contact details, business details, status toggle (active/inactive)
- Snackbar notifications for export completion, errors, updates

DIALOGS & POPUPS

Date Range Picker	Dialog	Allows user to select custom start and end dates for the Financials report instead of predefined periods
PDF Export Status	Snackbar	Shows success message with file path when trips, payments, or financials report is exported; shows error message if export fails

States / gating: Loading, Error with retry, Not found, Edit mode (with bottom bar), View mode with tabs, Financial data loading/error, Trip data loading/error, Payment data loading/error, PDF exporting

Create Customer

CreateCustomer Customers

Guided form for creating a new customer record. Collects required company and contact info with real-time validation and form completion progress indicator.

FEATURES

- Top app bar with back button and form completion progress bar (color-coded: gray <66%, yellow 66-99%, green 100%)
- Company & Contact section: Company Name (required, non-blank), Contact Person (required, non-blank), Primary Contact (required, 10-digit phone), Secondary Contact (optional, 10-digit phone), Email (optional, validated format)
- Business & Address section: GST Number (optional), Company Address (optional, multi-line), Notes (optional, multi-line)
- Bottom action bar with disabled Submit button until form is valid (all required fields filled, phone has exactly 10 digits, no validation errors)
- Real-time field validation with error messages displayed below each field
- Inline error banner at top of form if submission fails
- Submit button shows loading state when creating customer; text changes to 'Creating...'
- Responsive centered form layout on tablets/web, full-width on phones
- Scrollable form content to accommodate all fields

DIALOGS & POPUPS

Submit Confirmation/Error	Snackbar	Shows error message if customer creation fails; navigates to customer detail screen on success
---------------------------	----------	--

States / gating: Empty form, Partially filled (with progress bar), Validation errors, Saving/submitting, Success (navigates away)

Payment Detail

PaymentDetail Payments

Display full details of a single trip payment: trip info, customer details, financial breakdown, transaction info, and action buttons.

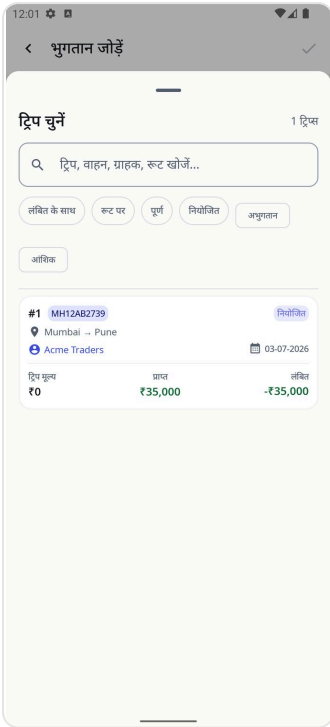

FEATURES

- Hero section: Payment amount, status badge (Received/Pending/Cancelled/Partial), payment date
- Download receipt button (top bar icon) to export payment as PDF
- More options menu: Download Receipt, Edit (if permitted), Delete (if permitted)
- Trip Info Card: Trip ID, Vehicle Registration, Driver Name, Start/End Location, Trip Date/Time
- Payment Details Card: Payment Type (Advance/Partial/Final/Refund), Payment Mode (Cash/UPI/Bank Transfer/Card/Credit), Receipt Number
- Customer Details Card: Customer Name, Company, Contact, GST (if applicable)
- Financial Info Card: Gross Amount, TDS Amount, Discount Amount, Net Amount
- Additional Info Card: Transaction ID (for UPI/Bank), Bank Name, Payment Source, Notes, Received By, Received At Location, Created By
- Loading and error states with retry button
- Scrollable vertical layout on all breakpoints

DIALOGS & POPUPS

Delete Confirmation Dialog	Confirmation	Confirm deletion of the payment; shows payment amount
Payment Receipt PDF Handler	Popup Menu	Export payment receipt as PDF with all details

States / gating: Loading (spinner), Error (retry button), Success (full detail display)

52-tripselector-card-route-customer-date-icons-HI.png

Add/Edit Payment

AddPayment / EditPayment Payments

Record a new trip payment or edit an existing payment. Allows selection of trip, entry of amounts, payment type/mode, date/time, and transaction details.

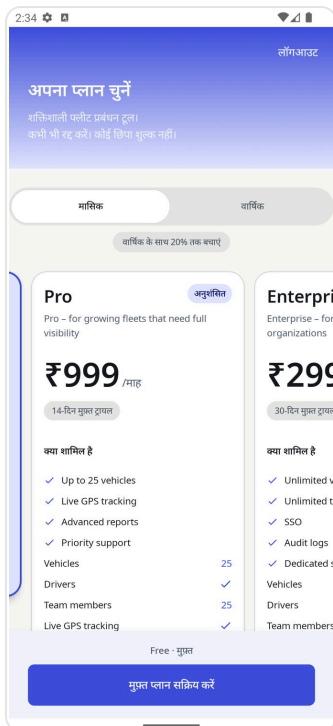

FEATURES

- Trip Selection Section: Tap card to open trip selector bottom sheet; shows Trip ID, Route (start → end), Vehicle Registration once selected
- Selected Trip Info Card (when trip picked): Trip Price, Pending Amount, Customer Name in 3-column layout; Trip Start/End Date/Time rows
- Amount Section: Input fields for Gross Amount (mandatory), TDS Amount, Discount Amount; Net Amount auto-calculated and read-only; real-time validation for amount exceeding trip pending balance
- Payment Type & Mode Section: Dropdown for Payment Type (Advance/Partial/Final/Refund) and Payment Mode (Cash/UPI/Bank Transfer/Card/Credit)
- Due Date Picker (shows only for Advance/Partial types)
- Date & Time Section: Date and time pickers with min date (trip start) and max date (today + 1 day); date format DD-MM-YYYY
- Transaction Details Section (shows for Bank Transfer or UPI): Transaction ID input, Bank Name input (for Bank Transfer), Payment Source/Account input
- Additional Info Section: Notes text area, Received By name input, Received At Location input
- Save Button (top bar icon): Save/Update label based on mode; spinner during save; disabled until form valid
- Cancel Button (back icon): Close form
- Error message display below form fields
- Loading state (full-screen spinner) during initialization

DIALOGS & POPUPS

Trip Selector Bottom Sheet	Bottom Sheet	Search and select a trip by ID, vehicle, location, or customer; filter by trip status (Completed/In Progress), payment status (Pending/Partial/Paid); shows pending amount sorted highest first; grid or single-column layout per breakpoint

Add Purchase Info

AddPurchaseInfo

Finance

Create a new vehicle purchase record. Record payment method (cash or loan), loan details, and bank info. Calculate EMI automatically.

FEATURES

- Vehicle Selection: dropdown of vehicles without purchase records; error if all have purchases
- Purchase Details Section: purchase date picker (DATE_ONLY), purchase price (₹), vendor name (text), invoice number (text)
- Payment Type Section: radio/icon options for Cash (₹ - green) or Loan (₹ - blue); select one
- Loan Details Section (appears when Loan selected):
 - - Down Payment (₹, required if loan)
 - - Loan Amount (read-only, auto-calculated: price - down payment)
 - - Financier Name (text, required if loan)
 - - Loan Account Number (text, optional)
 - - Interest Rate (% , decimal) and Tenure (months, number) side-by-side
 - - EMI Calculation Preview (auto-shows when rate/tenure/down payment valid): displays monthly EMI, total interest, total payable in blue info card
 - - EMI Start Date picker (DATE_ONLY, required if loan)
 - - Bank Reference subsection: Bank Name, Account Number, IFSC code (all optional)
 - - Auto Debit toggle (on/off)
- Notes Section: text area for additional notes
- Save button at top (TextButton in AppBar) and bottom (FleetButton, PRIMARY, full-width); disabled until form valid
- Form validation: required fields marked, errors shown inline under fields

DIALOGS & POPUPS

Date Picker	Date Picker	Select purchase date, loan start date
Success	Snackbar	Show purchase saved confirmation, navigate back
Validation Error	Snackbar	Show validation failure (e.g., invalid amount, missing required field)

States / gating: Saving (circular progress in Save button), Empty vehicles list (dropdown disabled with message)
